Find the Magnets

Did you know that you have magnets in your house? For example, why does the door on your refrigerator stay closed? Anything that has an electric motor (like a clock, a mixer, or an electric knife) has a magnet in it. Anything that has a speaker in it (like a TV, radio, or phone) has a magnet in it.

Look around your house to see how many things you can find that have magnets in them. The first one has been done for you.

ROOM	ITEM WITH A MAGNET
